I have a 1994 Explorer 4.0 V6 5 speed manual transmission. It has 178,000 km. After a long drive...maybe 300-400km I have big trouble putting it in any gear after it comes out of 5th. I don't have this trouble when driving aound short distances. I usually have to wait for about 20-30 minutes until things cool down to start shifting again.

A five-speed manual transmission was offered for 2002 before its discontinuation; as of the 2020 model year, it is the final year a Ford Explorer was available with a manual transmission. As an option for both the 4.0L and 4.6L V8 engines, the Ford 5R55 transmission

Bookmark File PDF 1994 Explorer Manual Transmission

was offered, becoming standard from 2003 to 2005.

Ford Explorer - Wikipedia

1994 Explorer has an A4LD trans. This trans shifts purely off of engine vacuum and the governor mounted onto the output shaft. The kickdown cable is just that....kickdown (passing gear) only. To properly check vacuum, you need a vacuum gauge. Disconnect the vacuum line at the modulator and connect the vacuum gauge. Engine vacuum at the modulator should be 17-20 inches at idle. Have a helper rap the gas pedal pretty hard. Vacuum on the gauge should drop to near zero, then back to 17-20 inches at idle ...

The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications
