Acura Warning Lights and Symbols | DashboardSymbols.com

My brake lights stayed on after the car was turned off. Had to pull the fuse in the box under the hood to turn them off. What I found today was on the brake pedal where the brake light switch is mounted. On the pedal itself was a plastic plug mounted in a hole right where the switch hits the pedal. The plug broke out leaving an open hole with ...

1997 Acura CL Vehicle Lights | etrailer.com

The brake light switch is a mechanical switch activated when you press the brake pedal. The switch has a plunger in it that contacts a lever in the brake pedal assembly. As that plunger is depressed when you push on the brake pedal, the contacts in the brake light switch closed and voltage flows to the brake lights — turning them on.
