What do young people need to know about their health - and how can you help them learn it? This practical guide will help you to broach health subjects (ranging from the banal to the embarrassing to the deadly serious) with the adolescents you encounter in your professional life. Drawing on research and collaboration with specialists in areas such as dietetics, mental health, drugs and alcohol, fitness, education and careers, along with young people themselves, Hot Topics in Adolescent Health provides a range of support mechanisms for professionals working with young people. Using interactive methods of delivery, this practical guide and complimentary CD provide figures, diagrams and suggested activities to explore each topic within a group setting and point to other resources for further information.
