Treaties are essential to the maintenance of international law and order, and States depend on them to provide stability and consistency in international relations. This publication contains the text of multilateral treaties that focus on nuclear weapons, other weapons of mass destruction, conventional arms, and nuclear-weapon-free zones, all of which are essential for promoting peace and security. It also includes treaties in which disarmament and non-proliferation are important elements within a larger framework of issues, such as the Antarctic Treaty or the Agreement Governing the Activities of States on the Moon and Other Celestial Bodies. The United Nations Office for Disarmament Affairs hopes this book will be a useful tool for diplomats, researchers, those in the service of States parties to the various treaties and conventions, those States not yet parties, and in promoting and furthering the universalization of these instruments.

The material for these volumes has been selected from the past twenty years' examination questions for graduate students at the University of California at Berkeley, Columbia University, the University of Chicago, MIT, the State University of New York at Buffalo, Princeton University and the University of Wisconsin.
