Covering all four critical care board exams (anesthesiology, surgery, internal medicine, and neurology), Critical Care Medicine Review: 1000 Questions and Answers prepares you for exam success as well as clinical practice in today ' s ICU. This full-color, easy-to-use review tool provides challenging case studies, relevant images, multiple-choice board-style questions, rationales for correct and incorrect answers, and references for every question. Edited by instructors of anesthesia and critical care from Harvard Medical School and Massachusetts General Hospital, this comprehensive resource is an ideal study guide for critical care fellows, recertifying practitioners, and CCRNs.

A unique question-and-answer book for surgical residents and trainees that covers all surgical aspects of critical care and acute or emergency medicine This is a comprehensive, one-of-a-kind question-and-answer text for medical professionals and apprentices concentrating on the growing subspecialty of surgery in critical care and emergency surgery. Covering all surgical aspects of critical care and acute or emergency surgery, it is an ideal learning and review text for surgical residents and trainees who care for these patients and those taking the Surgical Critical Care Board Examination. Edited by highly experienced professionals, and written in an engaging style, Surgical Critical Care and Emergency Surgery: Clinical Questions and Answers focuses exclusively on the unique problems and complexity of illnesses of the critically ill and injured surgical patient, and covers the specialist daily care such patients require. It reflects the latest advances in medical knowledge and technology, and includes fully revised and updated questions throughout, with additional topics addressed in a new companion website. Unique question-and-answer book on the growing specialty of critical care and acute surgery Ideal for US boards candidates Covers trauma and burns as well as critical care 8 page full-color insert showing high quality surgical photos to aid study Supplementary website including additional questions Surgical Critical Care and Emergency Surgery, Second Edition is an excellent resource for medical students, residents, fellows, and surgeons, as well as those in non-surgical specialties.

Neurocritical Care Board Review: Questions and Answers provides clinicians with a thorough review of the complex subspecialty of Neurocritical Care, using a question-and-answer (Q&A) format. The Q&A format is easily readable, high yield, and serves as good practice for test takers or anyone looking to improve or reinforce essential knowledge. The book covers the key topics pertinent to (and found on) neurocritical care boards, and is organized according to the exam core curriculum outline.. A total of 649 questions address both neuroscience critical care (general neurology, neurotrauma, neurovascular and neurosurgical problems) and general critical care topics (systems trauma, cardiovascular, infectious disease, pulmonary and renal issues, and hemodynamic monitoring). Detailed explanations follow in the answer section of each chapter, along with references for further study. Where relevant, neuroimaging, EEG and monitoring waveforms, and other images are included in case questions to allow candidates to familiarize themselves with these tools that form a significant part of the exam. Features of Neurocritical Care Board Review include: Comprehensive, high-yield review that covers all areas tested on the neurocritical care certifying exam Applicability to a wide range of physicians in multiple specialties reviewing for boards or looking to test skills and clinical acumen in this challenging area Question and answer format with detailed explanations and references to facilitate recall of must-know information and help identify knowledge gaps for further attention Material aggregated from multiple specialties into a singular resource for exam study

Today ' s critical care nurse needs a variety of skills and the ability to work with very different types of patients. The Basic Critical Care Training Program is designed for any nurse who wishes to obtain the solid foundation of skills and knowledge needed to safely and effectively care for the critically ill patient. Nurses who are just beginning their careers, nurses currently working with critically ill patients, and nurses who wish to change their clinical emphasis and begin working in critical care units are excellent candidates for this program. This program allows you to study when you want to and to practice valuable critical thinking skills prior to taking care of patients. This 75-contact-hour program is accredited by the American Nurses Credentialing Center (ANCC) Commission on Accreditation and is designed to be coordinated with a well-designed preceptor/mentor training program in a critical care unit. The program is based on the textbook recommended! by the American Association of Critical Care Nurses: AACN Clinical Reference for Critical Care Nursing. That textbook is required for the course and must be purchased separately. The course consists of 28 modules, as follows: Cardiac (5 modules), Respiratory (6 modules), Neurological (5 modules), Gastrointestinal (3 modules), Hematology (2 modules), Endocrine (2 modules), Renal (2 modules), Special (3 modules). Each module consists of questions referring to material presented in the text. Upon completion of this course, you will be able to provide safe, entry-level critical care nursing practice as you begin working with a preceptor/mentor in a critical care unit. Completing the Basic Critical Care Training Program will distinguish you as a knowledgeable, skilled, and committed professional.

An essential reference for nursing students in developing and implementing the competencies necessary in caring for critically ill patients. Includes sample test questions relevant to the model that will assist nursing students in preparing for certification through AACN.

Ensure you are up to date on all the common and urgent issues in the critical care unit with Priorities in Critical Care Nursing, 7th Edition! With its succinct coverage of all core critical care nursing topics, this evidence-based text is the perfect resource for both practicing nurses and nursing students alike. Using the latest, most authoritative research, this book will help you identify priorities to accurately and effectively manage patient care. Content spans the areas of medication, patient safety, patient education, nursing diagnosis, and collaborative management and much more to equip you for success in all aspects of critical care nursing. This new edition also features new case studies, new QSEN-focused call-out boxes throughout the text, a complete digital glossary, and revised chapter summaries. Evidence-based approach offers the most accurate and timely patient care recommendations based on the latest and most authoritative research, meta-analyses, and systematic reviews available. UNIQUE! Nursing Diagnosis Priorities boxes list the most urgent potential nursing diagnoses, with a page reference to the corresponding Nursing Management Plan. Nursing Management Plans provide a complete care plan for every Priority Diagnosis that includes the diagnosis, definition, defining characteristics, outcome criteria, nursing interventions, and rationales. Case studies with critical thinking questions test your understanding of key concepts and their practical applications. Concept maps help students understand common critical health conditions, including acute coronary syndrome, acute renal failure, ischemic stroke, and shock. Collaborative Management boxes guide you through the management of a wide variety of disorders. Patient Education boxes list the concepts that must be taught to the patient and the family before discharge from the ICU. Priority Medication boxes offer a foundation in the pharmacology used most in critical care. NEW! QSEN Evidence-Based Practice boxes use the PICOT framework to cover a timely topic and the research that underlies current patient care. NEW! TEACH for Nurses manual includes unique case studies, outlines, instructor resources, student resources, answer keys, and more. NEW! PowerPoint slides with unfolding case studies have been updated to include interactive questions and sample handoff information in the ISBARR format for appropriate chapters. NEW! Cultural Competency boxes provide information on basic cultural topics, including what cues to watch for and how to better provide culturally competent care. NEW! QSEN Teamwork and Collaboration boxes offer concise guidelines for effective handoffs, assessments, and communications between nurses and other hospital staff. NEW! QSEN Patient Safety Alert boxes highlight important guidelines and tips to ensure patient safety. NEW! QSEN Internet Resources boxes identify key organizations and websites for both general critical care practice and for each specific body system. NEW! Key points at the end of each chapter offer a quick study tool for students. NEW! More-detailed objectives now include every disorder covered in the chapter. NEW! Digital glossary on the Evolve companion site help to increase students' critical care nursing vocabulary.

"An essential review for residents across neurological disciplines, the chapters are organized into groups of questions covering neurobiology, neuroanatomy, clinical neurology, neuropathology, neuroradiology, neurosurgery, and critical care. Written and edited by neurosurgery residents who have passed the boards, the book works as an effective stand-alone review book or used in conjunction with The Definitive Neurological Surgery Board Review. Featuring hundreds of high-quality figures as well as high-yield tables, this essential review book concludes with a 300-question multidisciplinary self-assessment examination."--BOOK JACKET.

This evidence-based text is designed to help the undergraduate nursing student in a critical care rotation and for nurses new to critical care. Each clinical chapter has application to the AACN Synergy Model, identifying and matching patient characteristics and nurse competencies, leading to optimal patient outcomes.

Synergy for Clinical Excellence: The AACN Synergy Model for Patient Care, Second Edition is a unique text that encompasses the history and development of the nurse and patient characteristics inherent in the Synergy Model. Based on a decade of work by the American Association of Critical-Care Nurses (AACN), it can be used as the theoretical framework for the curriculum for universities, the model of practice for hospitals seeking Magnet status, the main theory behind AACN certifications, the framework for dissertations and DNP projects, and part of the foundation for the Consensus Model for Advanced Practice Nursing. The Second Edition includes new chapters on integrating the Synergy Model in the perioperative and ambulatory settings, applying the Synergy Model in practice, and tying the Synergy Model to the APRN Consensus Model. Completely updated and revised, it also provides sample test questions, practical examples, and the latest information to help prepare exam candidates.

Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up-to-date clinical information. An extensive knowledge of basic pathophysiology, as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient.
