APES in a Box was written by experienced APES teachers Benjy Wood and Dave Holbert.

Wolfgang Koehler demonstrated that chimpanzees could solve problems by applying insight. His research showed that the intellectual gap between humans and chimpanzees was much narrower than previously thought. The work was revolutionary when originally published in 1917 in German, but it was largely

ignored for decades because it violated the conventional wisdom that animal behavior is simply the result of instinct or conditioning. However, Koehler's research showed this was not the case. He used four chimps in his experiments, Chica, Grande, Konsul, and Sultan. The experiments consisted of placing chimpanzees in an enclosed area and presenting them with a desired object that was out of reach. In one experiment, Koehler placed bananas outside Sultan's cage and two bamboo sticks inside his cage which needed to be put together to reach the bananas. Koehler demonstrated the solution to Sultan by putting his fingers into the end of one of the sticks. After some contemplation, Sultan put the two sticks together and was able to reach the bananas. As Jaan Valsiner shows in his introduction to this classic work, Koehler's analysis of the intelligence of apes marked a turning point in the psychology of thinking and the

continuing struggle between behaviorism and cognitive psychology. Koehler achieved his two-fold aim: to determine the relationship between the intellectual capacity of higher primates and man, and to gain insight into the nature of intelligent acts.

Tarzan or John Clayton, Viscount Greystoke is the son of a British lord and lady who were marooned on the Atlantic coast of Africa by mutineers. When he was only an infant, his mother died, and his father was killed by Kerchak, leader of the ape tribe by whom John was adopted. He gets the ape name Tarzan and he is being raised in the African jungles by the Mangani great apes. Tarzan later experiences civilization only to largely reject it and return to the

wild as a heroic adventurer. Edgar Rice Burroughs (1875-1950) was an American writer best known for his creations of the jungle hero Tarzan and the heroic Mars adventurer John Carter, although he produced works in many genres. Beside Tarzan's adventures, Burroughs also wrote popular science fiction and fantasy stories involving Earthly adventurers transported to various planets (notably Barsoom, Burroughs's fictional name for Mars, and Amtor, his fictional name for Venus), lost islands, and into the interior of the hollow earth in his Pellucidar stories, as well as westerns and historical romances. In the Rue Morgue, the jungles of Tarzan, the fables of Aesop, and outer space, the apes in these seventeen fantastic tales boldly go where humans dare not. Including a foreword from Rupert Wyatt, the director of Rise of the Planet of the Apes, this provocative anthology delves into our fascination with and fear of our simian cousins. “Evil Robot Monkey” introduces a disgruntled chimp implanted with a chip that makes him cleverer than both his cohort and humans alike. In “Murders in the Rue Morgue,” a murder mystery unravels with the discovery of a hair that does not appear quite human. Merging steampunk with slapstick, “The Ape-Box Affair” has a not-so-ordinary orangutan landing on Earth in a spherical flying ship—where he is promptly mistaken for an alien. King Kong sets a terrible example with booze and Barbie dolls in “Godzilla’s 12-Step Program.” If you’ve ever wondered what

makes humans different from apes, soon you'll be asking yourself, is it even less than we think?

Presents an introduction to some of the world's primate species, with informative facts about such animals as chimpanzees, macaques, gibbons, baboons, orangutans, and gorillas.

While philosophers have been interested in animals since ancient times, in the last few decades the subject of animal minds has emerged as a major topic in philosophy. The Routledge Handbook of Philosophy of Animal Minds is an outstanding reference source to the key topics, problems, and debates in this exciting subject and is the first collection of its kind. Comprising nearly fifty chapters by a team of international contributors, the Handbook is divided into

eight parts: Mental representation Reasoning and metacognition Consciousness Mindreading Communication Social cognition and culture Association, simplicity, and modeling Ethics. Within these sections, central issues, debates, and problems are examined, including: whether and how animals represent and reason about the world; how animal cognition differs from human cognition; whether animals are conscious; whether animals represent their own mental states or those of others; how animals communicate; the extent to which animals have cultures; how to choose among competing models and explanations of animal behavior; and whether animals are moral agents and/or moral patients. The Routledge Handbook of Philosophy of Animal Minds is essential reading for students and researchers in philosophy of mind, philosophy of psychology, ethics, and related disciplines such as ethology, biology,
