Sigma Rules Guide for ArcSight. Introduction to Sigma. Sigma, created by Florian Roth and Thomas Patzke, is an open source project to create a generic signature format for SIEM systems. The common analogy is that Sigma is the log file equivalent of what Snort is to IDS and what YARA is for file based malware detection. However, unlike Snort and Yara, support for Sigma does not have to be built ...

~~Arcsight Logger User Guide - s2.kora.com~~

By default, if ArcSight Logger is installed by a root user, ArcSight listens on UDP port 514 and TCP port 515. If ArcSight Logger is installed by a non-root user, the default UDP port is 8514 and the TCP port is 8515. In this example, syslog messages are sent with UDP in a topology where ArcSight Logger is installed by a root user.
