Rules of Thumb for Chemical Engineers, Fifth Edition, provides solutions, common sense techniques, shortcuts, and calculations to help chemical and process engineers deal with practical on-the-job problems. It discusses physical properties for proprietary materials, pharmaceutical and biopharmaceutical sector heuristics, and process design, along with closed-loop heat transfer systems, heat exchangers, packed columns, and structured packings. Organized into 27 chapters, the book begins with an overview of formulae and data for sizing piping systems for incompressible and compressible flow. It then moves to a discussion of design recommendations for heat exchangers, practical equations for solving fractionation problems, along with design of reactive absorption processes. It also considers different types of pumps and presents narrative as well as tabular comparisons and application notes for various types of fans, blowers, and compressors. The book also walks the reader through the general rules of thumb for vessels, how cooling towers are sized based on parameters such as return temperature and supply temperature, and specifications of refrigeration systems. Smapp3D Piping automates the creation and modification of piping routes within SOLIDWORKS. Based on 3D sketches, pipes are generated with just a few mouse clicks. The pre-defined pipe specifications contain all necessary information, such as the pipe standard, fittings, material, insulation or pressure ratings. Drawings can then be derived from the created assemblies with the common SOLIDWORKS functionality using views, dimensions, parts lists, etc. This book concentrates on the program introduction and shows the reader the basic operation of Smapp3D Piping. This includes the creation and modification of pipe routes and parts libraries. As a supplement and pre-stage to the official Smapp3D training, this book is suitable to get a first impression of the software and its functionality. The readers should thus be able to evaluate whether this software product is a reasonable investment and fits their own requirements.
