Biotechnology. Applying the Genetic Revolution | David P ...

Many biotechnology applications use the principles and ideas behind replication; therefore, this chapter first introduces the basics of DNA replication as it occurs in the cell. We then review some of the most widely used techniques in genetic engineering and biotechnology, including chemical synthesis of DNA, polymerase chain reaction, and DNA sequencing.

Biotechnology Applying the Genetic Revolution ...

The reason we think of biotechnology as modern is because of recent advances in molecular biology and genetic engineering. Huge strides have been made in our understanding of microorganisms, plants, livestock, as well as the human body and the natural environment. This has caused an explosion in the number and variety of biotechnology products.
