Building A Dichotomous Key Answer Keys

A dichotomous key is a very useful tool. It helps you identify unknown organisms by using a system that breaks down the characteristics of a set of organisms into TWO groups over and over again until you only have one organism in a group (Di = two and you only have two choices at each splitting of groups). Building a dichotomous key is not as hard as you might think it would be. All it takes is a bit of concentration.

Building A Dichotomous Key Answer Keys

What IS a dichotomous key? A dichotomous key is a system used by scientists to identify different parts of the natural world. They can be used to identify rocks, plants, trees, birds, reptiles and mammals. Dichotomous keys are set up in a two question format, leading users through a set of choices designed to help them correctly identify the object of their inquisition.

Dichotomous Key Worksheets and Activities — Soekmonkey Science

Dichotomous Key Definition. A dichotomous key is a tool created by scientists to help scientists and laypeople identify objects and organisms. Typically, a dichotomous key for identifying a particular type of object consists of a specific series of questions. When one question is answered, the key directs the user as to what question to ask next. Dichotomous keys typically stress identifying species by their scientific name, as each individual species has a unique scientific name.
