Cardiopulmonary Anatomy & Physiology 7th Edition Textbook ...

During the cardiac cycle, the pressure in the cardiac chambers increases or falls, affecting valve opening or closure, thereby regulating blood flow between the chambers. Pressures in the left side of the heart are around five times higher than in the right side, but the same volume of blood is pumped per cardiac beat.

Cardiac system 1: anatomy and physiology | Nursing Times

The bundle of His is a collection of heart muscles cells specialised for electrical conduction. These cells receive input from the AVN. 1,4,5; The bundle of His branches into the left and right bundle branches which travel down the interventricular septum. Branches of the bundle of His propagate impulses to the left and right ventricles respectively.
