We offer these texts bundled together at a discount for your students. McBride: The Process of Research in Psychology A student friendly, thoughtfully organized introduction to research in psychology Employing numerous examples and the pedagogical approach of spaced repetition, this introductory text provides a step-by-step explanation of how to design, conduct, and present a research study in psychology. Chronologically organized and chock-full of pedagogy, this book creates logical scaffolding upon which students can build their knowledge. Lab Manual The Lab Manual for Psychological Research by Dawn M. McBride and J. Cooper Cutting (available separately or bundled with the text) provides the perfect supplement for instructors who teach a lab component with their methods course or would simply like to provide their students with more guidance and practice in conducting their own research project. Ancillaries available at [www.sagepub.com/mcbridestudysite](http://www.sagepub.com/mcbridestudysite) Password-protected instructor resources include a test bank, PowerPoint slides, sample syllabi, answers/tips for the in-text questions, an answer key for the Lab Manual and class discussion topics and activities. An open-access student study site provides chapter summaries and objectives, E-flashcards, Web quizzes, SAGE journal articles, and additional Web resources. Wagner: Using IBM® SPSS® Statistics for Social Statistics and Research Methods A concise and affordable guide to using SPSS/PASW Statistics for statistical analysis Praise for Using SPSS for Social Statistics and Research Methods "Overall, this is an essential resource for me to use in my statistics courses. I have a lot of time dedicated to hands on data analysis in a lab setting and this book is as valuable to students as their main statistics text. I will definitely use it in the future." –Robert M. Silverman, University at Buffalo. Ideal as a companion to a statistics or research methods text or as a stand-alone guide, Using IBM® SPSS® for Social Statistics and Research Methods, Third Edition, uses images and directions drawn directly from SPSS/PASW Version 18.0 (for both PC and Mac computers) to teach undergraduate students how to use the software to manage data or to conduct statistical data analysis. This fully updated pocket-size guide addresses a wide variety of data analysis topics, making it useful for the classroom or for independent study, and offers a number of useful insider tips and hints for students. The Third Edition also offers the use of a dataset from the latest version of the General Social Survey (GSS) on our Student Study Site at [www.sagepub.com/wagner3e](http://www.sagepub.com/wagner3e).

This bundle includes McBride: The Process of Research in Psychology 3e and McBride: Lab Manual for Psychological Research Revised 3e

The Process of Research in Psychology employs the pedagogical approach of spaced repetition to present a student-friendly introduction to conducting research in psychology. Drawing on more than 17 years of teaching experience, best-selling author Dawn M. McBride covers topics with step-by-step explanations to help students understand the full process of designing, conducting, and presenting a research study. Early chapters introduce important concepts for developing research ideas, subject sampling, ethics, and data collection; more detailed coverage of these topics is included in "More About" chapters to provide instructors with flexibility in their teaching. Concepts and skills relevant to more than one stage of the research process are covered in multiple contexts, providing repeated exposure to the topics students often struggle with but that are the most important in gaining research skills. INSTRUCTORS: Bundle The Process of Research in Psychology, Fourth Edition with the Lab Manual for Psychological Research, Fourth Edition for only \$5 more! Bundle ISBN: 978-1-5443-6348-6

We offer these texts bundled together at a discount for your students. Dawn M. McBride, The Process of Research in Psychology, Second Edition Utilizing numerous examples from published research and the pedagogical approach of spaced repetition, this introductory text provides a step-by-step explanation of how to design, conduct, and present a research study in psychology. Early chapters introduce important concepts for developing research ideas, subject sampling, ethics, and data collection to help students understand the process of research. Subsequent "Nuts and Bolts" chapters provide more detailed coverage of these topics and examine the various types of research relevant to the field of psychology. This approach creates a logical scaffolding upon which students can build their knowledge and allows for an easy-to-read, concise format that provides students with the appropriate information required to do research in psychology! Dawn M. McBride, J. Cooper Cutting, Lab Manual for Psychological Research, Third Edition Packed full of useful exercises, checklists, and how-to sections, this robust lab manual gives students hands-on guidance and practice conducting their own psychological research projects.

This new text provides students with the background and the process of statistical analysis along with the nuts and bolts tools for applying specific statistical tools to data from research studies. McBride will help students to understand that statistics can be applied and used in day to day life, and she will make a direct connection between the process of research design and the tools employed in statistical analysis.

This bundle includes Dawn M. McBride's The Process of Research in Psychology, 4e (Paperback) and SAGE IBM® BUNDLE® for v26.0 Student Version.

Using diverse examples from published research, the Third Edition of The Process of Research in Psychology by Dawn M. McBride provides step-by-step coverage on how to design, conduct, and present a research study. Early chapters introduce important concepts for developing research ideas while subsequent "nuts and bolts" chapters provide more detailed coverage of topics and examine the types of research relevant to the field. This logical two-part structure creates an excellent foundation upon which students can build their knowledge of the entire research process.

Cognitive Psychology: Theory, Process, and Methodology introduces readers to the main topics of study in this exciting field through an engaging presentation of how cognitive processes have been and continue to be studied by researchers. Using a reader-friendly writing style and focusing on methodology, authors Dawn M. McBride and J. Cooper Cutting cover such core content as perception, attention, memory, language, reasoning and problem solving, and cognitive neuroscience. Updates to the Second Edition include a reorganization of long-term memory topics to improve readability, revised pedagogical tools throughout, a refreshed visual program, and additional real-life examples to enhance understanding.
