There are many challenges that children with Asperger's syndrome (AS) will have to overcome to reach their highest potential. In order to help them progress in constructive ways, those who care for and about these children often need to make changes too, sometimes difficult ones. Stuck provides a roadmap for understanding and addressing the complexities of AS, especially the presence of obsessive-compulsive behaviors (OCBs) that so frequently complicate basic functioning for both the child and others involved in their lives. The more knowledge and skills that caregivers can gain about these issues the better. Whether you are a parent, an educator, or a healthcare professional that wants to increase their awareness about Asperger's syndrome and obsessive-compulsive behaviors, you can benefit from the useful concepts and practical, action-oriented activities presented throughout this book.

The location is South Central Los Angeles, 1985, and every kid on the block is getting paid in full selling crack cocaine, but not DAIQUAN JOHNSON. He's a slow to learn but good with his hands kind of kid whose dream is to become an engineer one day. DAIQUAN is hard working and doesn't give in easily, but all the determination in the world may not prove enough for a passing grade in a major they said he had no business in. Academic probation, a teenage father, and below average math skills are just part of his problems. DAIQUAN'S worse fear is soon realized when he finds that his confederate battle flag waving Calculus professor, GODDAME has a hatred for the color black. The continuously applied stress-strain curve of life events diverts DAIQUAN'S attention away from higher education while he contemplates a potentially lucrative and illicit offer from his best friend back in the hood, Michael Miller, nicknamed Deadly Paws. But if DAIQUAN decides to challenge the Jim Crow calculus instructor, he must get a perfect score on his final exam or dwell in a world where crack is king.
