Real-life primary care case studies* from more than 50 primary care providers, including physician assistants, nurse practitioners, and physicians! 101 Primary Care Case Studies offers real-life patient scenarios and critical thinking exercises to help you work through a patient's chief complaint. Through narrative case studies, you will determine how best to diagnose, treat, and manage your patient based on the history of present illness, review of systems, relevant history, and physical examination findings. This workbook will ask probing questions to help you determine differential and most likely diagnoses, diagnostic tests to order, and appropriate patient management strategies using relevant and timely references to support your decisions. The organization of each case study simulates the patient care journey from chief complaint to outcome. Serving as a virtual clinical preceptor, this workbook can be used independently or in a classroom setting. It is accompanied by a robust online student supplement that provides answers to all questions, real outcomes of the cases, and valuable personal insights from the authors on how the patient was successfully managed. Not only will this workbook help you work through patient cases clinically, it will also share important, but often overlooked, bedside manner skills needed to successfully communicate with and care for your patients. Covering conditions across all organ systems and across the lifespan, this workbook is organized by chief complaint, providing an authentic perspective on what to expect in the patient care environment. It even includes information on pathophysiology and how to use ICD-10 and CPT (E/M) codes in your documentation. The book uniquely weaves together both the science and art of medicine by including personal insights into quality and compassionate care. Key Features Provides real-life patient cases from an interprofessional author team of physician assistants, nurse practitioners, and physicians Uses a templated case study design and critical thinking exercises to help you methodically work through various patient scenarios Teaches clinical and bedside manner skills imperative for delivering quality patient care Covers patients across the lifespan, including pediatric, adolescent, adult, and geriatric populations Offers additional insight on patient education, medical and legal concerns, and interprofessional collaboration Includes a robust online student supplement with valuable insights from the authors on how they successfully managed the cases Provides instructors with a table of contents that is filterable by chief complaint, diagnosis, patient population, and organ system *Details changed to protect patient information.

Real-world scenarios help you develop clinical reasoning skills for primary care! Case Studies in Primary Care: A Day in the Office, 2nd Edition includes 50 case studies on the most commonly encountered situations in primary care. Demonstrating the kinds of health problems that a Nurse Practitioner or Physician Assistant might see during a typical clinical day, case studies cover patients from various cultures and all ages. You're asked to analyze data and think critically in reaching accurate diagnoses and planning effective treatment; you can then submit your responses online for grading and instant feedback.

Revitalizing Health for All examines thirteen cases of efforts to implement CPHC reforms from around the globe including Australia, Brazil, Democratic Republic of Congo, Iran, South Africa, and more.

"Real world" case studies for 44 of the most commonly encountered situations in primary care: includes scheduled appointments, follow-up evaluations, and phone calls; features all age groups and a variety of cultures; provides a mix of client detail and background information, with a few surprises thrown in ... just like a "normal day in the office;" and encourages critical thinking and a thorough analysis of the appropriate delivery of primary care. The consistent format includes introductory data and chief complaint, additional points to consider, detailed feedback with differential diagnosis, and treatment options.

Pediatric Primary Care Case Studies is a collection of pediatric case studies of common health problems of well, acutely ill, and chronically ill children. This text provides students with the opportunity to assess the scenario, differential diagnoses, treatment and educational plans. The cases include history and physical examination data and provide suggested case solutions. The cases include developmental, behavioral, and disease problems written to include family, cultural, and other contextual issues which must be considered to provide optimal care. Current guidelines and evidence-based research are used to support the care recommendations. Pediatric Primary Care Case Studies provides realistic ambulatory care cases that allows students to develop their critical thinking skills as they work through common situations faced by health care providers.

Practice nurses and nurse practitioners working alongside general practitioners are required to see and treat patients with a variety of minor and complex conditions. They therefore need skills in history-taking, physical assessment, diagnosing, prescribing and managing long-term conditions. It is assumed that nurses who read this book will have experience in managing the care of babies, children, well young people, people for whom English is not their first language, people with mental health problems and older people with multiple health problems. These case studies are loosely based on interactions that the author has had with patients in Primary Care.

For many citizens primary health care is the first point of contact with their health care system, where most of their health needs are satisfied but also acting as the gate to the rest of the system. In that respect primary care plays a crucial role in how patients value health systems as responsive to their needs and expectations. This volume analyses the way how primary care is organized and delivered across European countries, looking at governance, financing and workforce aspects and the breadth of the service profiles. It describes wide national variations in terms of accessibility, continuity and coordination. Relating these differences to health system outcomes the authors suggest some priority areas for reducing the gap between the ideal and current realities.

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

This landmark text is dedicated to the conversation had between a primary care physician and a dermatologist that is a true reflection of the way medicine works when these physicians collaborate on the same case. The book uses actual case studies from the authors' offices and provides an accurate and real portrayal of the types of skin conditions primary care physicians encounter. Answering questions such as when to treat, how to treat, when to refer, when to biopsy, and when to reassure, this book informs and educates primary care physicians with a dermatologist's perspective. Top 50 Dermatology Case Studies for Primary Care gives the reader an entirely new vantage point from which to view dermatologic cases, and together with one of New York City's top dermatologists, the authors look at the same case, the same patient, and compare what each did or would have done. Written for family medicine and internal medicine physicians, residents and providers, Top 50 Dermatology Case Studies for Primary Care proves to be an invaluable resource in their day-to-day practices.
