Catalog Of Stc And Iic Ratings For Wall And Floor Ceiling

The STC rating for a basic insulated 2 x 4 wall with a single layer of drywall on each side is 35-38. This rating increases to STC 42-45 with steel studs. The STC rating for a basic wood structure floor/ceiling is 40-43. The STC rating for a six inch concrete sub-floor is 52-55. A good level of isolation for walls and ceilings is STC 50 plus.

represents a material or product ' s ability to block sound from travelling through a wall, ceiling, floor or other building assembly – in other words, to stop airborne noise transferring from place to place. It is the most common sound measurement system in North America – that ' s why you ' ll see it associated with so many soundproofing products.
