Learn when and how to use CPDLC for the Challenger 300, 350, 605, and 650; Understand the general CPDLC rules and regional differences; Learn what to do in an emergency situation; Employs a scenario-based approach where you will perform normal and abnormal flight tasks crossing the Atlantic Ocean; Available anytime and anywhere via the internet

The key to the successful completion of any flight, whether a short-distance domestic flight or an ultra long-haul flight, is meticulous planning, timely preparation, precise execution, and the crew's ability to anticipate and cope with sudden changes. Every trip is unique. Some are more challenging than others and you can always count on last minute changes and surprises. For the most part, however, trips tend to be uneventful but never routine. Upon a successfully completed trip we derive a great sense of satisfaction knowing that we completed it safely, effectively, and efficiently (in that order of importance).What follows is a four-sector westbound trip around the world in a Gulfstream G650ER. This particular trip underscored the immense value of a business jet in optimizing high level executives' productivity. Although this trip is seen primarily from a pilot's perspective there were many other highly capable and dedicated professionals whose contributions made it possible. These individuals, who take great pride in what they do and how they do it, are part of the support system that make airplanes like the Gulfstream G650 a powerful business tool. This book was written, in great part, as a tribute to them.
