Comprehension About The Circulatory System

The circulatory system is one of several systems of the human body that work together to keep a person healthy. The body takes oxygen into the lungs when a person breathes. This oxygen is then transported throughout the body into all of the cells of the body by the circulatory system. The main function of the circulatory system is to carry blood throughout our bodies.

### ~~The Circulatory System Reading Comprehension~~

The heart is the most important part of the circulatory system because without it blood would not be pumped throughout the body. The blood vessels are the most important part as they carry the blood with nutrients and oxygen to the

### ~~The Circulatory System Reading Comprehension~~

This is a reading comprehension about the Respiratory System and the Circulatory System and how they work together to achieve homeostasis within the body. It is aligned to 7th-grade essential standards - body systems unit. The article is written in friendly and engaging language. It is about a page.

### ~~Circulatory System Reading Worksheets & Teaching Resources ...~~

circulatory system is like a transportation system involving the heart, the arteries, blood and the veins. The main function of the circulatory system it to transport and deliver blood, nutrients and oxygen to all parts of your body.

### ~~Circulatory System Comprehension Activity Worksheets~~

The circulatory system refers to how our lungs, heart, and veins/arteries/blood vessels work together to move blood around the body. Our blood plays a very important role, as it distributes oxygen, nutrients and hormones to our cells. Our bodies work very hard to keep this up all the time, even when we're sleeping, and this keeps us alive.

### ~~Blood and the Circulatory System: Differentiated Worksheets~~

The primary function of the circulatory system is to keep blood flowing throughout the body in order to fight diseases and maintain homeostasis (healthy internal balance). According to the US National Library of Medicine, the circulatory system is made up of three independent systems: the cardiovascular, pulmonary, and systemic systems.

### ~~Circulatory System Facts, Worksheets, Cycle & Heartbeat ...~~

Your circulatory system is like the freight train that delivers essential supplies to wherever they are needed in your body. 2 As blood travels to all parts of your body, it delivers food and oxygen to your cells. It removes carbon dioxide and other waste materials. Along the way, it also helps to regulate your body temperature.

### ~~Circulatory System | edHelper.com~~

The circulatory system refers to how our lungs, heart and veins/arteries/blood vessels work together to move blood around the body. This blood plays a very important role, as it distributes oxygen, nutrients and hormones to our cells. Our bodies work very hard to keep this up all the time, even when we're sleeping, and this keeps us alive.

### ~~Blood and the Circulatory System: Differentiated Worksheets~~

The circulatory system refers to how our lungs, heart, and veins/arteries/blood vessels work together to move blood around the body. Our blood plays a very important role, as it distributes oxygen, nutrients and hormones to our cells. Our bodies work very hard to keep this up all the time, even when we're sleeping, and this keeps us alive.

### ~~Blood and the Circulatory System: Differentiated Worksheets~~

This fun word search includes words that are associated with the circulatory system. See if your students can find all of the words hidden in the grid. To make it more interesting you could see how many words they can find in a given time! ... Reading comprehension - Fossils

### ~~Science: Circulatory System Quiz | Worksheet | PrimaryLeap ...~~

PDF (720.82 KB) This easy to read, one page passage all about the circulatory system (also called the cardiovascular system) is perfect for science. It includes 10 multiple choice reading comprehension questions and an answer key. The passage explains the parts of the human circulatory system and how they are used.

### ~~Circulatory System Reading Passage Worksheets & Teaching ...~~

It is a liquid tissue that carries nutrients and oxygen to all your body's cells and also fights off disease-causing germs. Blood has four main parts: plasma, red cells, white cells, and platelets.
