Starting with the publication of their seminal bestseller, Future Shock, Alvin and Heidi Toffler have given millions of readers new ways to think about personal life in today ' s high-speed world with its constantly changing, seemingly random impacts on our businesses, governments, families and daily lives. Now, writing with the same rare grasp and clarity that made their earlier books classics, the Tofflers turn their attention to the revolution in wealth now sweeping the planet. And once again, they provide a penetrating, coherent way to make sense of the seemingly senseless.Revolutionary Wealth is about how tomorrow ' s wealth will be created, and who will get it and how. But twenty-first-century wealth, according to the Tofflers, is not just about money, and cannot be understood in terms of industrial-age economics. Thus they write here about everything from education and child rearing to Hollywood and China, from everyday truth and misconceptions to what they call our " third job "—the unnoticed work we do without pay for some of the biggest corporations in our country. They show the hidden connections between extreme sports, chocolate chip cookies, Linux software and the " surplus complexity " in our lives as society wobbles back and forth between depressing decadence and a hopeful post-decadence. In their earlier work, the Tofflers coined the word " prosumer " for people who consume what they themselves produce. In Revolutionary Wealth they expand the concept to reveal how many of our activities—whether parenting or volunteering, blogging, painting our house, improving our diet, organizing a neighborhood council or even " mashing " music—pump " free lunch " from the " hidden " non-money economy into the money economy that economists track. Prosuming, they forecast, is about to explode and compel radical changes in the way we measure, make and manipulate wealth. Blazing with fresh ideas, Revolutionary Wealth provides readers with powerful new tools for thinking about—and preparing for—their future.

The thoroughly revised and updated fifteenth edition of Management - A Global, Innovative and Entrepreneurial Perspective takes an international view of management. This book comprehensively covers the latest management advancements. Entrepreneurial and innovative perspectives of management are integrated throughout in this edition. Based on real-life business experiences and integration of theory with practice, this edition focuses on the professional development of its readers by providing exercises that encourage students to enhance their professional profile and network. Salient Features: Inclusion of professional development and global networking exercises Inclusion of exclusive interviews with leading executives to help students gain more professional insights Real-time examples from global, innovative, international, entrepreneurial, and leadership perspectives of management from leading companies such as Apple, Google, Facebook, Nissan, Boeing, Cisco, Netflix, General Motors, General Electric, and many others Case study with questions that ends each chapter Key ideas and Concepts for Review, For Discussion,Action Steps, and Internet Research in all chapters for better understanding

When her horrible blind date is found dead in the house she has been hired to restore and she is the main suspect, contractor Shannon Hammer investigates with the help of a handsome crime writer in order to clear her name.

. The book that takes a comprehensive look at the threat to our food supply from genetic engineering. . 15,000 copies sold in the first six months. . Includes new studies about the dangers of genetically engineered food. . Refutes the "feed the poor" propaganda spread by agribusinesses. . Is both an expose and educational primer on this controversial technology that is already a part of every American's diet. . Explains the dangers of these foods to ourselves and our environment in easily understood terms. Picture a world? . Where the french fries you eat are registered as a pesticide, not a food. . Where vegetarians unwittingly consume fish genes in their tomatoes. . Where corn plants kill monarch butterflies. . Where soy plants thrive on doses of herbicide that kill every other plant in sight. . Where multinational corporations own the life forms that farmers grow and legally control the farmers' actions. That world exists These things are all happening, and they are happening to you. Genetically engineered foods--plants whose genetic structures are altered by scientists in ways that could never occur in nature--are already present in many of the products you buy in supermarkets, unlabeled, unwanted, and largely untested. The threat of these organisms to human and environmental health has caused them to be virtually banned in Europe, yet the U.S. government, working hand-in-hand with a few biotech corporations, has actively encouraged their use while discouraging labeling that might alert consumers to what they are eating. The authors show what the future holds and give you the information you need to preserve the independence and integrity of our food supply. What can you do? First, inform yourself. Genetically Engineered Food: Changing the Nature of Nature is the first book to take a comprehensive look at the many ramifications of this disturbing trend. Authors Martin Teitel and Kimberly Wilson explain what genetic engineering is and how it works, then explore the health risks involved with eating organisms never before seen in nature. They address the ecological catastrophe that could result from these modified plants crossing with wild species and escaping human control altogether, as well as the economic devastation that may befall small farmers who find themselves at the mercy of mega-corporations for their livelihood. Taking the discussion a step further, they consider the ethical and spiritual implications of this radical change in our relationship to the natural world, showing what the future holds and giving you the information you need to act on your own or to join others in preserving the independence and integrity of our food supply.

Originally published by HarperCollins in 1992.

Aiming to bridge the gap between theory and application, this work focuses on strategic management.

Completely reorganised and comprehensively rewritten for its second edition, this guide to reliability-centred maintenance develops techniques which are practised by over 250 affiliated organisations worldwide.

Bond is the number one series for 11 plus (11+) practice, with over 45 years of experience. Written by expert authors Bond Tests and Papers offer comprehensive support for all 11 plus subjects. Tried and trusted, Bond has helped millions of children achieve 11 plus success.

For undergraduate courses in Strategic Management, Strategy, and Business Policy. Designed in functional four-color, it offers a popular practitioner-oriented perspective, focuses on skill-building in all major areas of strategy formation, implementation, and evaluation, and weaves three very contemporary themes throughout each chapter-globalization, the natural environment, and e-commerce. 41 Experiential Exercises, and 41 cases are included.
