This choice collection contains some of the most significant contributions to psychoanalytic and psychological understanding of the effect of object loss on adults and children. Designed for psychoanalysts, psychotherapists and students of psychoanalysis and psychotherapy, this important volume focuses on those contributions most directly relevant to the clinical situation, without neglecting fundamental descriptive and theoretical contributions. Rita V. Frankiel has culled the literature on object loss and assembled the most salient and conceptually powerful contributions to the field. Each paper is introduced with a brief summary of its contribution to the development of our understanding of object loss. This valuable resource thus provides the serious student of object loss with a ready source of the most important materials on the subject. Contributors: Karl Abraham, Sol Altschul, John Bowlby, Helene Deutsch, J. Marvin Eisenstadt, George Engel, Joan Fleming, Sigmund Freud, Erna Furman, Robert Furman, Edith Jacobson, Melanie Klein, Paul Lerner, Erich Lindemann, Hans W. Loewald, Marie E. McAnn, George Pollock, Hanna Segal, Chistina Sekaer, Vamik D. Volkan, and Martha Wolfenstein.

Among Freud's discoveries, none has proved more theoretically valid or clinically productive than his demonstration that humans regularly and inevitably repeat with the analyst patterns of relationship, fantasy, and conflict experienced in their childhood. Transference phenomenon and its analysis in therapy is the cornerstone for much psychoanalytic work. Its crucial importance has been and continues to be a matter of debate among psychoanalysts. Essential Papers on Transference presents the central papers on the subject of transference from Freud's time to our own. Although many reflect viewpoints within the psychoanalytic mainstream, efforts have been made to be as inclusive as possible; thus neo-Freudian, Kohutian, and Lacanian statements are represented. The book underscores the fact that the meaning, the therapeutic use, and even the theoretical explanation of transference and transference phenomena have undergone significant changes over the years.

Narcissism has recently been the focus of debate among professionals, in large part due to the controversies surrounding the world of Heinz Kohut and Otto Kernberg. Yet much has been written about narcissism throughout the history of psychoanalysis and this carefully selected collection brings together the essential work on narcissism. The book first puts forth the major theoretical formulations - self-psychology, object relations, psychodynamics - and then explores diagnostic and therapeutic applications. The book offers landmark classic and contemporary contributions by authors such as Annie Reich, Heinz Kohut, Otto Kernberg, Alice Miller, Arnold Modell, and many others.

No work has informed Jewish life and history more than the Talmud. This unique and vast collection of teachings and traditions contains within it the intellectual output of hundreds of Jewish sages who considered all aspects of an entire people's life from the Hellenistic period in Palestine (c. 315 B.C.E.) until the end of the Sassanian era in Babylonia (615 C.E.). This volume adds the insights of modern talmudic scholarship and criticism to the growing number of more traditionally oriented works that seek to open the talmudic heritage and tradition to contemporary readers. These central essays provide a taste of the myriad ways in which talmudic study can intersect with such diverse disciplines as economics, history, ethics, law, literary criticism, and philosophy. Contributors: Baruch Micah Bokser, Boaz Cohen, Ari Elon, Meyer S. Feldblum, Louis Ginzberg, Abraham Goldberg, Robert Goldenberg, Heinrich Graetz, Louis Jacobs, David Kraemer, Geoffrey B. Levey, Aaron Levine, Saul Lieberman, Jacob Neusner, Nahum Rakover, and David Weiss-

In *Essential Papers on Countertransference*, Benjamin Wolstein has carefully gathered the classic essays which trace the development of countertransference as a psychoanalytic concept and explore the various ways in which it has been defined and used by various psychoanalytic schools. The volume includes selections from the work of Sigmund Freud, D. W. Winnicott, Clara Thompson, Harold F. Searles, and Heinrich Racker, among others. Wolstein's introduction offers a provocative perspective on the concept of countertransference and places in context the many controversies surrounding its use by analysts. Contributors: Mabel Blake Cohen, Ralph M. Crowley, Lawrence Epstein, Arthur H. Feiner, Sandor Ferenczi, Sigmund Freud, Merton M. Gill, Douglas W. Orr, Heinrich Racker, Otto Rank, Theodor Reik, Janet MacKenzie Rioch, Harold F. Searles, Leo Stone, Edward S. Tauber, Clara Thompson, Lucia E. Tower, and D. W. Winnicott.

In 1910, New York City was bursting at the seams as more and more people crowded into a limited supply of housing in the tenement districts of Manhattan and the older areas of Brooklyn. With no outlet for its exploding population, and the burgeoning social problems created by the overwhelming congestion, New York faced a serious crisis which city and state leaders addressed with dramatic measures. In March 1913, public officials and officers of the two existing rapid transit networks shook hands to seal a deal for a greatly expanded subway system which would more than double the size of the two existing transit networks. At the time the largest and most expensive single municipal project ever attempted, the Dual System of Rapid Transit set the pattern of growth in New York City for decades to come, helped provide millions of families a better quality of life, and, in the words of Manhattan borough president George McAneny (1910-1913), "proved the city's physical salvation." It stands as that rare success story, an enormously complicated project undertaken against great odds which proved successful beyond all measure. Published in conjunction with the History of the City of New York Project.
