The human rights records of more than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken in 2016 by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Contents: (1) Background of the Iran Sanctions Act (ISA): Key Provisions: ¿Triggers¿ and Available Sanctions; Waiver and Termination Authority; Iran Freedom Support Act Amendments; Effectiveness and Ongoing Challenges: Energy Routes and Refinery Investment: Refinery Construction; Significant Purchase Agreements; Efforts in the 110th and 111th Congress to Expand ISA Application; Other Energy-Related Sanctions Ideas; (2) Relationships to Other U.S. Sanctions: Ban on U.S. Trade and Investment With Iran; Treasury Department ¿Targeted Financial Measures¿; Terrorism-Related Sanctions; Executive Order 13224; Proliferation-Related Sanctions; Efforts to Promote Divestment; Blocked Iranian Property and Assets. Tables.

The 2021 World Trade Report analyses how digital technologies are transforming global commerce and international trade cooperation. It examines in particular how trade is likely to evolve in the coming 10 to 15 years as a result of digital technologies, such as 3D printing, artificial intelligence and blockchain. Case studies will provide concrete examples of how companies are already using new technologies to streamline their operations. The report will also include contributions from academics and leading experts on how they see digital technologies having an impact on the future of trade and the nature of trade cooperation.

A comprehensive but concise overview of Iran's politics, economy, military, foreign policy, and nuclear program. The volume chronicles U.S.-Iran relations under six American presidents and probes five options for dealing with Iran. Organized thematically, this book provides top-level briefings by 50 top

experts on Iran (both Iranian and Western authors) and is a practical and accessible "go-to" resource for practitioners, policymakers, academics, and students, as well as a fascinating wealth of information for anyone interested in understanding Iran's pivotal role in world politics.

Provides an understanding about the impact of culture and communication on international business negotiations. This work explores the problems faced by Western managers while doing business abroad and offers guidelines for international business negotiations. It also focuses on an important aspect of international business: negotiations.

U.S.-Iran relations have been mostly adversarial-but with varying degrees of intensity-since the 1979 Islamic Revolution in Iran. U.S. officials have consistently identified Iran's support for militant Middle East groups as a significant threat to U.S. interests and allies, and Iran's nuclear program took precedence in U.S. policy after 2002 as that program advanced. In 2010, the Obama Administration led a campaign of broad international economic pressure on Iran to persuade it to agree to strict limits on the program-an effort that contributed to Iran's acceptance of the July 2015 multilateral nuclear agreement known as the Joint Comprehensive Plan of Action (JCPOA). That agreement exchanged sanctions relief for limits on Iran's nuclear program, but did not contain binding limits on Iran's missile program, its regional influence, or human rights abuses. The Trump Administration cited the JCPOA's deficiencies in its May 8, 2018, announcement that the United States would exit the accord and reimpose all U.S. secondary sanctions. The stated intent of that step, as well as subsequent imposition of additional sanctions on Iran, is to apply "maximum pressure" on Iran to compel it to change its behavior, including negotiating a new JCPOA that takes into account the broad range of U.S. concerns. Iran has responded to the maximum pressure campaign by undertaking actions against commercial shipping in the Persian Gulf and by undertaking modest violations of some JCPOA restrictions. Before and since the escalation of U.S.-Iran tensions in May 2019, President Trump has indicated a willingness to meet with Iranian leaders. However, Administration statements and reports detail a long litany of objectionable behaviors that Iran must change for there to be any dramatic change in U.S.-Iran relations. Iranian leaders say they will not talk with the Administration unless and until it reenters the 2015 JCPOA. Some experts assert that the threat posed by Iran stems from the nature and ideology of Iran's regime, and that the underlying, if unstated, goal of Trump Administration policy is to bring about regime collapse. In the context of escalating U.S.-Iran tensions in 2019, President Trump has specifically denied that this is his Administration's goal. Any U.S. regime change strategy presumably would take advantage of divisions and fissures within Iran, as well as evident popular unrest. In part as a response to repression as well as economic conditions, unrest erupts periodically, most recently during December 2017-January 2018, and sporadically since then, including in response to the regime's apparent mishandling of relief efforts for vast flooding in southwestern Iran. To date, the unrest is not at a level where it threatens the leadership's grip on power. U.S. pressure has widened leadership differences in Iran. Hassan Rouhani, who seeks to improve Iran's relations with the West, including the United States, won successive presidential elections in 2013 and 2017, and reformist and moderate candidates won overwhelmingly in concurrent municipal council elections in all the major cities. Nevertheless, hardliners continue to control the state institutions that maintain internal security largely through suppression.

World Tourism Cities: A Systematic Approach to Urban Tourism is a unique and contemporary textbook that addresses the particular situation of urban tourism destinations in the 2020s by reviewing key issues, trends, challenges and future opportunities for urban tourism destinations worldwide, as well as city destination management. The book is divided into four parts, with Part I providing background chapters on world tourism cities. It begins by clearly defining world tourism cities and explaining the impacts of globalisation and urbanisation on these cities. The subsequent chapter explains the urban

tourism phenomenon and traces its growth. Part II presents city destination management, planning and development and the marketing and branding of cities, offering practical solutions and approaches. Part III discusses major issues and trends in world tourism cities including resident well-being and quality of life, sustainability, smart tourism, crises and the rise of tourism in Asian cities, and the final part identifies the future opportunities for city tourism. Written in a student-friendly tone, the book is richly illustrated and contains several engaging features, including Sweet tweets (snippets of information on cities) and Short breaks (detailed case studies on cities). This will be essential reading for all tourism students.

The human rights records of more than ninety countries and territories is put into perspective in Human Rights Watch's signature yearly report, which, in the 2014 volume, highlighted the armed conflict in Syria, international drug reform, drones and electronic mass surveillance, and more, and also featured photo essays of child marriage in South Sudan, the cost of the Sochi Winter Olympics in Russia, and religious fighting in Central African Republic. Reflecting extensive investigative work undertaken in 2014 by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report 2015 is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

"Over the years, there have been numerous efforts to locate the roots of the Islamic Republic's intentions and motivations in the distinctiveness of its political culture and history. A rich and ancient nation, Iran has always beguiled outsiders. This complexity, combined with America's lack of access to Iran since 1979, has produced a peculiar view of the Islamic Republic, a view defined by mystique and a superficial reading that places too much emphasis on Iran's 'abnormal' and 'exceptional' characteristics. This document is a short, accessible guide intended to help U.S. policymakers understand the Islamic Republic. It offers a set of short analytic observations about the processes, institutions, networks, and actors that define Iran's politics, strategy, economic policy, and diplomacy. From these, it sets out an argument for appreciating the challenges and fundamentals of negotiating with Iran."--Summary, p. ix.

The Islamic Revolution in 1979 transformed Iranian society and reshaped the political landscape of the Middle East. Four decades later, Darioush Bayandor draws upon heretofore untapped archival evidence to reexamine the complex domestic and international dynamics that led to the Revolution. Beginning with the socioeconomic transformation of the 1960s, this book follows the Shah's rule through the 1970s, tracing the emergence of opposition movements, the Shah's blunders and miscalculations, the influence of the post-Vietnam zeitgeist and the role of the Carter administration. The Shah, the Islamic Revolution and the United States offers new revelations about how Iran was thrown into chaos and an ailing ruler lost control, with consequences that still reverberate today.
