Management of Infectious Disease

Online Library Infectious Disease Management In Animal Shelters...

Dermatophytosis is the most common contagious and infectious skin disease of cats and very difficult to eradicate in catteries and shelters (Frymus et al., 2013). Incoming cats should be dewormed and treated for external parasites. In areas endemic for heartworm, cats aged more than 2 months should be placed on a prevention regime.

Infectious diseases in shelter situations and their management

This strategy is effective in minimizing in-shelter transmission of infection. 1. Diagnosis of the disease 2. Isolation of sick animals 3. Quarantine of exposed asymptomatic animals 4. Assessment of infection risk in exposed animals 5. Protection of unexposed animals (clean break) 6. Biosecurity and environmental decontamination 7. Documentation 8.
