Innovation to the Core Innovation is the management mantra of modern business. Either a business has it, gets it, or disappears into mediocrity. As this book argues, in a globalised economy marked by hyper-competition and rapid commoditisation, innovation stands out as the distinctive attribute of companies with peer-beating results (think Apple, IKEA, Google).

As core markets become saturated and new competitors emerge, traditional approaches that have successfully driven growth for years—product innovation and pricing strategy, for example—are reaching the point of diminishing returns.

**Using Business Model Innovation to Reinvent the Core**

Innovation (not) at the core. July 23, 2019. By Claudio Cisullo. A common mistake in industries faced by severe performance pressure is to turn to well-known innovation tools and strategies. Especially in sectors where innovation is not at the core of the business, a new approach is required. A proven method has entered the race - so far, with impressive results.

THE FUTURE STARTS NOW. In Core Innovation, we've learnt that building meaningful innovation means being ready to do things differently. We work day by day to make sure Telefónica is capable of flowing and adapting to the future, and we have the conviction that the raw material that is going to give us the tools to evolve, are Telefónica's own assets and resources: its networks, its data and its video platforms and services.

To answer these questions, the Global Innovation Council (GIC) supported by the Mohammed Bin Rashid Centre for Government Innovation (MBRCGI), has been developing a “Core of government taxonomy”. Taxonomy aims at helping governments to identify where they can and have to improve, be it their principles, capabilities, processes or functions.
