### Miessler Solution - bitofnews.com

a) Ethane in staggered conformation has C 3-rotational axis passing through the C-C bond. It has three C 2-rotational axes perpendicular to the principal C 3-rotational axis and through the mid-point of the C-C bond. It has not any h-plane. But it has 3 d-planes containing two carbons and anti two hydrogens. Hence the point group of ethane in the staggered conformation will be D 3d.
