Dispute settlement Resolving trade disputes is one of the core activities of the WTO. A dispute arises when a member government believes another member government is violating an agreement or a commitment that it has made in the WTO. The WTO has one of the most active international dispute settlement mechanisms in the world.

International dispute settlement plays a fundamental role in maintaining the fabric of the international legal order, reflecting the desire of States, and increasingly non-State actors, to resolve their differences through international dispute procedures and other legal mechanisms. This edited collection focuses upon the growth and complexity of such legal methods, which includes judicial settlement (courts and tribunals), arbitration and other legal (or what might be termed 'extra-legal') means (international organisations, committees, inspection panels, and ombudsmen). In this important collection, such mechanisms are compared and evaluated side-by-side to provide, in one volume, a detailed and analytical account of the current framework. Ranging from key conceptual issues of proliferation of legal mechanisms and the associated risks of fragmentation through to innovations in dispute settlement mechanisms in many topical areas of international law, including international trade law, collective security law and regional law, this collection, written by leading international lawyers, provides a major study in the ongoing trends and emerging problems in this crucial area of international law. This edited collection is published to mark the retirement of Professor John Merrills, Emeritus Professor of International Law, University of Sheffield, who has written widely on international law and human rights law, but is probably best known for his work on the settlement of international disputes, evidenced by the enduring appeal of his leading text International Dispute Settlement, now in its fourth edition.

A guide to the techniques and institutions used to solve international disputes, how they work and when they are used. This textbook looks at diplomatic (negotiation, mediation, inquiry and conciliation) and legal methods (arbitration, judicial settlement). It uses many, often topical, examples of each method in practice to place the theory of how things should work in the context of real-life situations and to help the reader understand the strengths and weaknesses of different methods when they are used. It also looks at organisations such as the International Court and the United Nations and has been fully updated to include the most recent arbitrations, developments in the WTO and the International Tribunal for the Law of the Sea, as well as case law from the International Court of Justice.

The latest edition of this successful textbook on the techniques and institutions used to solve international disputes, how they work and when they are used, looks at diplomatic (negotiation, mediation, inquiry and conciliation) and legal methods (arbitration, judicial settlement). It uses many, often topical, examples of each method in practice to place the theory of how things should work in the context of real-life situations, helping the reader to understand the strengths and weaknesses of different methods when they are used. Fully updated throughout, the sixth edition includes all the latest case law, as well as new sections on investment arbitration and regional trade disputes. It is an essential resource for advanced undergraduate and postgraduate courses on international dispute settlement.

The very purpose of international law is the peaceful settlement of international disputes. Over centuries, states and more recently, organizations have created substantive rules and principles, as well as affiliated procedures, in the pursuit of the peaceful settlement of disputes. This volume of the Library of Essays in International Law focuses on the classic procedures of peaceful settlement: negotiation, good offices, inquiry, conciliation, arbitration, judicial settlement, and agencies for dispute resolution. The introduction provides a unique historic overview, explaining how the procedures first developed and changed over time. Each chapter features a seminal essay that helped create the changes described in the introduction. Being at the center of international law, dispute resolution has always been a core topic of international scholarship, this volume brings together for the first time, the pivotal writing in the field.

In the second part of the book the emerging principles of procedural law applied in these tribunals are discussed."--Jacket.

*Litigating International Law Disputes* provides a fresh understanding of why states resort to international adjudication or arbitration to resolve international law disputes. A group of leading scholars and practitioners discern the reasons for the use of international litigation and other modes of dispute settlement by examining various substantive areas of international law (such as human rights, trade, environment, maritime boundaries, territorial sovereignty and investment law) as well as considering case studies from particular countries and regions. The chapters also canvass the roles of international lawyers, NGOs, and private actors, as well as the political dynamics of disputes, and identify emergent trends in dispute settlement for different areas of international law.

Addressing not only inter-state dispute settlement but also the settlement of disputes involving non-State actors, *The Peaceful Settlement of International Disputes* offers a clear and systematic overview of the procedures for dispute settlement in international law. In light of the diversification of dispute settlement procedures, traditional means of international dispute settlement are discussed alongside newly developing fields such as the dispute settlement system under the United Nations Convention on the Law of the Sea, the WTO dispute settlement systems, the peaceful settlement of international environmental disputes, intra-state disputes, mixed arbitration, the United Nations Compensation Commission, and the World Bank Inspection Panel. Figures are used throughout the book to help the reader to better understand the procedures and institutions of international dispute settlement, and suggestions for further reading support exploration of relevant issues. Suitable for postgraduate law and international relations students studying dispute settlement in international law and conflict resolution, this book helps students to easily grasp key concepts and issues.

*The Law of International Conflict* deals with three key principles of international law from a policy-oriented perspective that includes insights from various social sciences.

This collection of documents brings together a large number of primary sources on the peaceful settlement of disputes in a usable and affordable format. The documents included reflect the diverse techniques of international dispute settlement, as recognised in Articles 2(3) and 33 of the UN Charter, such as negotiation, mediation, arbitration and adjudication. The book comprises the most relevant multilateral treaties establishing dispute settlement regimes, as well as examples of special agreements, compromissory clauses, optional clause declarations and relevant resolutions of international organisations. It covers both diplomatic and adjudicative methods of dispute settlement and follows a basic division between general dispute settlement mechanisms, and sectoral regimes in fields such as human rights, WTO law, investment, law of the sea, environmental law and arms control. The book is the first widely-available collection of key documents on dispute settlement. It is aimed at teachers, students and practitioners of international law and related disciplines.
