The series of standards ISO/IEC 25000,
also known as SQuaRE (System and
Software Quality Requirements and
Evaluation), has the goal of creating a
framework for the evaluation of software
product quality. ISO/IEC 25000 is the
result of the evolution of several other
standards; specifically from ISO/IEC
9126, which defines a quality model for

The new ISO 50001 standard for energy management systems can help safeguard

Download File PDF Iso 25000 Standards

our future by making a positive difference in the here and now. Developing an Energy Management System ISO 50001 is based on the management system model of continual improvement also used for other well-known standards such as ISO 9001 or ISO 14001.

~~ISO ISO 50001 Energy management~~
ISO 25010 is a great framework to define software metrics important for a particular project. It is not a comprehensive, detailed map, but rather a guide you can use, depending on the circumstances. Every development project has different priorities and metrics, and this standard allows enough leeway to work with all of them. What do you think?
