Shares the life of the first female to work as a professional balloonist, making more than sixty ascents until 1819, when she became the first woman to die in an aviation accident.

Behold the story of Sophie Blanchard, an extraordinary woman who is largely forgotten despite her claim to being the very first female pilot in history. In eighteenth-century France "balloonomania" has fiercely gripped the nation ... but all of the pioneering aeronauts are men. The job of shattering that myth falls to a most unlikely figure: a shy girl from a seaside village, entirely devoted to her dream of flight. Sophie is not the first woman to ascend in a balloon, nor the first woman to accompany an aeronaut on a trip, but she will become the first woman to climb to the clouds and steer her own course. The words of Matthew Clark Smith bring Sophie's story to light after so many years, while Matt Tavares' atmospheric art and unique perspectives take her to new heights.

"Smith tells Sophie's inspiring story with a buoyant sense of wonder, fitting for a woman who was happiest in the air. Her accomplishments and passion for flight are brought beautifully to life by Tavares." --

Booklist (starred review) Take to the skies with the story of Sophie Blanchard, an extraordinary woman who is largely forgotten despite her claim to being the very first female pilot in history. In eighteenth-century France, "balloonomania" has fiercely gripped the nation . . . but all of the pioneering aeronauts are men until a shy girl comes along, devoted to her dream of flight. Sophie is not the first woman to ascend in a balloon, nor the first woman to accompany an aeronaut on a trip, but she will become the first woman to climb to the clouds and steer her own course.

**\*\*Kirkus Best Books of the Year (2013)\*\*** **\*\*Time Magazine 10 Top Nonfiction Books of 2013\*\*** **\*\*The New Republic Best Books of 2013\*\*** In this heart-lifting chronicle, Richard Holmes, author of the best-selling *The Age of Wonder*, follows the pioneer generation of balloon aeronauts, the daring and enigmatic men and women who risked their lives to take to the air (or fall into the sky). Why they did it, what their contemporaries thought of them, and how their flights revealed the secrets of our planet is a compelling adventure that only Holmes could tell. His accounts of the early Anglo-French balloon rivalries, the crazy firework flights of the beautiful Sophie Blanchard, the long-distance voyages of the American entrepreneur John Wise and French photographer Felix Nadar are dramatic and exhilarating. Holmes documents as well the balloons used to observe the horrors of modern battle during the Civil War (including a flight taken by George Armstrong Custer); the legendary tale of at least sixty-seven manned balloons that escaped from Paris (the first successful civilian airlift in history) during the Prussian siege of 1870-71; the high-altitude exploits of James Glaisher (who rose) seven miles above the earth without oxygen, helping to establish the new science of meteorology); and how Mary Shelley, Edgar Allan Poe, and Jules Verne felt the imaginative impact of flight and allowed it to soar in their work. A seamless fusion of history, art, science, biography, and the metaphysics of flights, *Falling Upwards* explores the interplay between technology and imagination. And through the strange allure of these great balloonists, it offers a masterly portrait of human endeavor, recklessness, and vision. (With 24 pages of color illustrations, and black-and-white illustrations throughout.)

Presents a chronicle in verse of the life of Bessie Coleman, the first African-American aviator, who dreamed of flying as a child in the cotton fields of Texas and persevered until she made that dream come true. Reprint.

Michelangelo saw something—someone—special in the stone. No one wanted the "giant." The hulking block of marble lay in the work yard, rained on, hacked at, and abandoned—until a young Michelangelo saw his David in it. Night and day, Michelangelo worked in secret, lovingly coaxing statue out of the stone. Its majesty endures even today. This is the story of how a neglected, discarded stone became a masterpiece for all time. It is also a story of how humans see themselves reflected in

## Where To Download Lighter Than Air Sophie Blanchard The First Woman Pilot

art. Back matter includes further information about David and a selected bibliography

Meet ROBERT E. LEE is the story of a great American leader forced to make a terrible decision. Robert E. Lee the Virginian, son of a Revolutionary hero, served in the U.S. Army as America moved towards Civil War. Loving his country, he hated to see the Union split, but he could not fight against the South. His agonizing decision, his brilliant military leadership, and the fine example he set when the battle was done, are all recounted in this thoroughly researched and richly illustrated book.

Tallest, wisest, most studious--Lincoln was simply superlative! Get to know the personal side of Honest Abe (his LEAST FAVORITE nickname) through fresh and funny poems expressing his superlative nature. Abraham Lincoln is famous for many extremes: he was the TALLEST president, who gave the GREATEST SPEECH and had the STRONGEST conviction. But did you know that he was also the MOST DISTRACTED farmer, the BEST wrestler, and the CRAFTIEST storyteller? Nineteen poems share fascinating stories about events in Lincoln's life, while history notes go even deeper into how he excelled. Don't forget to think of all the ways you, too, are superlative!

The true story of eighteenth-century mathematician Sophie Germain, who solved the unsolvable to achieve her dream. When her parents took away her candles to keep their young daughter from studying math...nothing stopped Sophie. When a professor discovered that the homework sent to him under a male pen name came from a woman...nothing stopped Sophie. And when she tackled a math problem that male scholars said would be impossible to solve...still, nothing stopped Sophie. For six years Sophie Germain used her love of math and her undeniable determination to test equations that would predict patterns of vibrations. She eventually became the first woman to win a grand prize from France's prestigious Academy of Sciences for her formula, which laid the groundwork for much of modern architecture (and can be seen in the book's illustrations). Award-winning author Cheryl Bardoe's inspiring and poetic text is brought to life by acclaimed artist Barbara McClintock's intricate pen-and-ink, watercolor, and collage illustrations in this true story about a woman who let nothing stop her.

This riveting nonfiction picture book biography explores both the failures and successes of self-taught engineer Emma Lilian Todd as she tackles one of the greatest challenges of the early 1900s: designing an airplane. Emma Lilian Todd's mind was always soaring--she loved to solve problems. Lilian tinkered and fiddled with all sorts of objects, turning dreams into useful inventions. As a child, she took apart and reassembled clocks to figure out how they worked. As an adult, typing up patents at the U.S. Patent Office, Lilian built the inventions in her mind, including many designs for flying machines. However, they

## Where To Download Lighter Than Air Sophie Blanchard The First Woman Pilot

all seemed too impractical. Lilian knew she could design one that worked. She took inspiration from both nature and her many failures, driving herself to perfect the design that would eventually successfully fly. Illustrator Tracy Subisak's art brings to life author Kirsten W. Larson's story of this little-known but important engineer.
