A Vedic Concordance is a monumental work by the famous American Sanskritist Maurice Bloomfield planned prepared and published during the years 1892-1906. It affords primarily an easy and ready means of ascertaining the following things: First where a given mantra occurs if it occurs but once second whether it occurs wlsewhere either with or without variants and in what places and third if it occurs with variants what those variants are. One hundred and nineteen texts in all have been drawn upon for contributions to the concordance comprising .The concordance also includes a very considerable amount of material not yet published. The concordance may also be readily put to certain indirect or secondary uses which are scarcely less important for the systematic progress of vedic study.

In the present volume,the author has confirmed emphatically that India was also the original homeland not only of the Indo-Aryans but also of the Indo-Iranians and the Indo-Europeans.

This book is compiled with the goal of explaining the hidden history, significance, and meaning of the mantras used in common Hindu puja rituals performed by the Bengalis to the Bengali immigrants.

This text details the Pándavas' 13th year in exile, when they live disguised in King Viráta's court. They suffer the humiliation of becoming servants. Having maintained their disguise until the very end of the year, then their troubles really begin.

Includes entries for maps and atlases.
