With direct-injected engines such as Mercury OptiMax, use 1 ounce of DFI engine oil instead of fogging oil. A small oil can with a long flexible neck works best to inject the oil into the cylinders for this application. Russell also recommends putting a coat of anti-seize lubricant on the plugs' threads before (carefully) replacing them.

propeller for a particular boat seems simple. But one factor affects another, which then affects another factor, leading many boaters to believe that propeller selection depends more on black magic than logic. All the questions are answered in this complete reference, the first of its kind. This clear, easy-to-use handbook for all small boats is written not for Ph.D.s seeking the latest wrinkle in high-tech propeller design, but as a practical aid for the average mechanic, engineer, boatbuilder, fleet operator, serious yachtsman, or naval architect.

transformation and so shows how we can return to what really matters most. The result is a manifesto for all progressive Christians who seek the best path for following Jesus today. With each chapter embodying a distinct conviction, Borg writes provocatively and compellingly on the beliefs that can deeply ground us and guide us, such as: God is real and a mystery; salvation is more about this life than an afterlife; the Bible can be true without being literally true; Jesus's death on the cross matters—but not because he paid for our sins; God is passionate about justice and the poor; and to love God is to love like God. Borg calls all American Christians to reject divisiveness and exclusivity and create communities that celebrate joy, possibility, and renewal. Throughout, he reflects on what matters most, bringing to earth the kingdom of God Jesus talked about and transforming our relationships with one another. Rich in wisdom and insight, *Convictions* is sure to become a classic of contemporary Christianity.
