Social Work explores the
application of recent
research in neuroscience to
prevention and intervention
in multiple systems,
settings, and areas such as
the neurobiology of stress
and the stress response
system, the impact of early
adversity and toxic stress
on brain development, early
childhood and adolescent
brain development, and the
application of this science
to prevention and
intervention in areas such
as child welfare and
juvenile justice.

Neuroscience recognizes that the brain/mind is dependent on ongoing social relations throughout our lives

(Cozolino, 2006; Siegle, 2013; Cacioppo, Visser, & Pickett, 2006). Cozolino, (2006) states that, "As a species, we are just waking up to the complexity of our own brains, to say nothing of how our brains are linked together.
