## Blood Vessels Vol. II Regional Innervation

Blood Vessel  
Innervation - an  
overview |

ScienceDirect Topics

Most arteries and veins  
in the body are  
innervated by  
sympathetic adrenergic  
nerves, which release  
norepinephrine (NE) as  
a neurotransmitter.

Some blood vessels are

Innervation

innervated by  
parasympathetic  
cholinergic or  
sympathetic cholinergic  
nerves, both of which  
release acetylcholine  
(ACh) as their primary  
neurotransmitter.

Abstract. The postnatal  
development of  
adrenergic innervation  
was followed in  
peripheral blood vessels  
of Wistar rats. The  
femoral vessels and

# Download Free Nonadrenergic

their branches, the superficial epigastric and saphenous vessels, and the tail artery, were investigated from birth to maturity.
