An ever-increasing number of plaintiffs are claiming post-traumatic stress disorder. Why such a sudden, marked rise in this form of litigation? Descriptions of post-traumatic stress disorder (PTSD) were first recorded in the sixth century B.C. Though the symptoms associated with the illness have remained generally the same, the name of the condition itself has changed many times. In World War I ...

stress disorder (PTSD) has become the favored diagnosis in cases of emotional distress. Also, in criminal law, defenses based on PTSD have become increasingly common, being used as the standard defense in selected situations. The limits of the use of PTSD as a defense remain to be clarified; differing judgments have been made in similar cases by different courts.
