I purchased the Kindle version of Na Pua o Kokee, and I will be bringing it with me on my next trip to Koke'e State Park. It covers about 75 native Hawai'ian plants, arranged alphabetically by their Hawai'ian names (when known; otherwise scientific names are used), and there is an index of flowering times.

Sijobang - the singing of a poetic narrative about the legendary hero Anggun Nan Tungga - is a form of popular entertainment in the area around Payakumbuh, in the highlands of West Sumatra. Although the

story exists as a written text, it is best known locally as drama and sung narrative, and it is its character as an oral performance that forms the subject of this book. Nigel Phillips begins by setting sijobang in its cultural and literary context, and then goes on to describe the social background and training of the paid storytellers who perform the narrative. He presents a summary of the story, and discusses its transient, fragmentary and unstandardized form. Transcriptions and translations of two recorded performances follow, leading into a description of sijobang's main linguistic and literary features. Finally, Dr Phillips examines in some detail the extent to which performances vary from one occasion to another, and what connection this may have with the storyteller's degree of experience.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

German classicist's monumental study of the origins of European thought in Greek literature and philosophy. Brilliant, widely influential. Includes "Homer's View of Man," "The Olympian Gods," and "Aristophanes and Aesthetic Criticism."

Classical Syriac is the language of the Syriac speaking churches and was used over a wide area of the Middle East so that a large amount of documents have come down to us. This grammar, designed to replace Brockelmann's "Syrische Grammatik", consists of a descriptive, namely not historical or comparative, grammar of the language with a fairly extensive morphosyntax and syntax, some practical language exercises with key, verb paradigms, a subject index, a bibliography of 25 pages on Syriac studies, an anthology of extensively annotated texts representing various genres of the Syriac literature from various periods in the three Syriac scripts, an accompanying glossary and a list of proper nouns occurring in the anthology. Although the grammar is intended primarily for beginning students of Syriac, it also contains (especially in the morphosyntax and syntax section) results of the author's independent research. In this second edition, obvious errors in the first edition have been corrected, the bibliography has been expanded by six pages, and the presentation has been improved upon.
