Recently, I got a taste of SANSUI's range of 1970s vintage tuner-amplifiers with the SANSUI 800 bought at a second hand store. Before I got round to thoroughly reviewing it, another SANSUI collector bought it off me. A great receiver from Sansui's golden era. This is a 1975 model, 2 x 60W RMS. It has controls for nearly everything you can think of, including a mic input (yes, it can play an electric guitar...), radio reception is strong and the sound is typical Sansui of this era: sweet and open. A completely different sound that carries you back in time, those of you know good vintage audio will know what ...

Released in 1974 the Sansui 881 retailed for \$529.95 and was the top-of-the-line receiver in the Sansui lineup at the time. Others in the line included the 771, 661, 551, 441, 331, and 221. At an underrated 60 watts per channel into 8 ohms it packs plenty of power and total harmonic distortion comes in at a respectable 0.3%.
