ABAP: Programming (BC-ABA) ABAP (Advanced Business Application Programming) is an SAP programming language and a component of the SAP NetWeaver application platform. Most commercial applications offered by SAP are written in ABAP. Application developers at SAP use ABAP to program SAP application components. SAP partners and customers use ABAP to program their own applications or to enhance the standard systems delivered by SAP and modify them to their own requirements.

ABAP: Programming (BC-ABA) - SAP Help Portal

BC - ABAP Dictionary The ABAP Dictionary centrally describes and manages all the data definitions used in the system. The ABAP Dictionary is completely integrated in the ABAP Workbench. All the other components of the Workbench can actively access the definitions stored in the ABAP Dictionary.

BC - ABAP Programming. This documentation describes how to write application programs within the three-tier client/server architecture of the R/3 System. R/3 applications are written in the ABAP programming language, and run within the application layer of the R/3 System. ABAP programs communicate with the database management system of the central relational database (RDBMS), and with the graphical user interface (SAPgui) at presentation level.
