Students who are interested in taking Saxon Homeschool Geometry course may chose the 4th edition Algebra 1 and Algebra 2 courses, which are designed to accompany Geometry. Featuring the same incremental approach that is the hallmark of the Saxon program, the 4th Edition Algebra 1 and Algebra 2 textbooks feature more algebra and precalculus content and fewer geometry lessons than their 3rd edition counterparts.

Saxon math programs produce confident students who are not only able to correctly compute, but also to apply concepts to new situations. These materials gently develop concepts, and the practice of those concepts is extended over a considerable period of time. This is called "incremental development and continual review." Material is introduced in easily understandable pieces (increments), allowing students to grasp one facet of a concept before the next one is introduced. Both facets are then practiced together until another one is introduced. This feature is combined with continual review in every lesson throughout the year. Topics are never dropped but are increased in complexity and

practiced every day, providing the time required for concepts to become totally familiar. Algebra 1, third edition is made up of five instructional components: Introduction of the New Increment, Examples with Complete Solutions, Practice of the Increment, Daily Problem Set, and Cumulative Tests. Algebra 1 covers topics typically treated in a first-year algebra course. This set contains a student text, answer key, and test forms. A solutions manual is available separately. Grade 9.

Saxon Math is easy to plan and rewarding to teach. The focus on providing teachers with strategies for developing an understanding of HOW and WHY math works builds a solid foundation for higher-level mathematics. - Publisher.

Algebra 1 covers all the topics in a first-year algebra course and builds the algebraic foundtion essential for all students to solve increasingly complex problems. Higher order thinking skills use real-world applications, reasoning and justification to make connections to math strands. Algebra 1 focuses on algebraic thinking and multiple representations -- verbal, numeric, symbolic, and graphical. Graphing calculator labs model mathematical situations. - Publisher.

Introduces basic topics in algebra, continues the study of geometry concepts begun in Algebra 1/2, and teaches the fundamental aspects of problem solving.

Written by Stephen Hake, author of the Saxon Middle Grades programs, Saxon Intermediate 3 is ideal for students looking for a textbook approach that provides a smooth transition into Math 5/4. It is also helpful for students who are coming to Saxon from other programs. Math Intermediate 3 teaches mathematical concepts through informative lessons, helpful diagrams, and interactive activities and investigations.
