Gentile's study involved 430 children between the ages of 7 to 11 years (grades 3-5) from 5 Minnesota schools. He found that exposure to media violence is one of six risk factors to predict later...

How Does Violence In The Media Impact School Bullying?

While many people believe that media violence is clearly to blame for school violence, there is no convincing research to support this claim. On the contrary, studies have shown that while media violence has increased in recent years school violence has declined. Moreover, research that claims the contrary has proven inconclusive.

The Media And School Violence - SlideShare

This article examines how the print news media report on the problem of school crime and violence. Based on a sample of news stories from The New York Times and USA Today, it analyzes the characteristics of these reports and how they fuel fears of school crime and violence. The study reveals that print news articles frame school crime as bad or getting worse; that they persistently remind readers about the potential for tragedy at school; that they rely on emotional responses to inform ...

The News Media on School Crime and Violence: Constructing ...

School shootings are a contagion. And the media are consistent accomplices in most every one of them. There's really no useful debate on the point. The consensus of social scientists since David...
