Welcome to the website of the Faculty of Automatic Control and Computers, University POLITEHNICA of Bucharest. Established in 1967, the Faculty of Automatic Control and Computers has as mission the development of a fertile environment for education, research and innovation, key factors in the expansion of the knowledge-based economy.

About Us | Facultatea de Automatic ă i Calculatoare

Signals and Systems. Semester 1. This course serves to introduce students to the input-output mode of thinking. Students will be taught how to translate the everyday notions of cause and effect into input-output models. They will be required to study, understand and use a set of mathematical tools for describing and analyzing inputs and outputs and the relationships between them.
