The Sony Corporation has released the Alpha 77 M2 camera as one of the newest in its Alpha line. Part of the Alpha line, the 77 M2 DSLR camera was launched to the public in May of 2014 as the improved version of the Alpha SLT A77 camera. The new device is often referred to as ILCA-77M2 and a77 II. The new model has been lauded for the vast amount of enhanced features it now offers to photo enthusiast globally.

This book provides enthusiastic photographers with a wealth of information about the unique features of the Sony SLT-A77, an interchangeable-lens camera with an electronic viewfinder and a fixed, translucent mirror. The A77 differs from the current crop of DSLRs in its ability to use a phase detection focusing system throughout the entire picture-taking process, for both still photographs and videos. This provides an immediacy and responsiveness when using burst shots and creating HD videos that is unavailable in any other camera. In this guide, authors Carol Roulland and Brian Matsumoto teach you how to obtain exceptional photographs and videos as they cover everything from the basics of using the camera's automatic modes, to the more advanced aperture-priority, shutter-priority, program, and manual exposure modes. You'll also learn how best to take advantage of features such as the built-in dynamic range adjustment, sweep panoramic, GPS, colorization modes, facial detection and recognition, multiple shot exposures, and HD video. The authors provide you with an opportunity to improve your skills even further by discussing how third-party software and accessories can improve Sony's standard commands. You'll also learn about how the electronic viewfinder, fixed mirror, and Sony's novel shutter design improve the camera's utility for scientific photography through the microscope and telescope.
Additional topics include: Advantages of the electronic viewfinder for previewing your photographs
Using the accessory Sony shoe-mount flash
Advantages of using the JPEG file format
Advantage of having a fixed mirror and electronic first curtain shutter
Settings for using the camera on a microscope and telescope
Using the older Minolta Maxxum lenses
