Committee on Standards in Public Life - GOV.UK

This manual has been used as the standard for 30 years in the fast growing public works construction market. It is available now, in the new 2000 edition. The Twelfth Edition is updated to include the most recently tested and accepted materials for public works.

This unique book gives approved standards for all types of public works construction - from the depth of paving on roads to the adhesive used on pavement markers. The "Greenbook" standardizes public works plans and specs to provide guidelines for both cities and contractors so they can agree on construction practices used in public works and has been adopted by over 200 cities, counties, and agencies throughout the U.S. This 2012 Edition is the 16th edition, which is updated and republished every three years. In each of the two years between publication of a new Greenbook edition, the changes which have been researched and approved by the committee during the preceding year, are published in pamphlet form as amendments to the current edition. This program maintains a "living" document in public works specifications. Stripes in the margin of each new edition point out significant changes in the text adopted since the preceding edition.

The new 2021 Edition brings the specifications in the "Greenbook" completely up to date in accordance with best practices and the latest technologies. Arranged in major sections, the "Greenbook" covers General Provisions for public works construction as well as detailed specification. Use of the "Greenbook" lowers construction costs by encouraging participation in competitive bidding by more private contractors. The "Greenbook" is published every three years under the oversight of Public Works Standards, Inc. (PWSI). The members of PWSI include the American Public Works Association (APWA), Associated General Contractors of California (AGCC), Engineering Contractors Association (ECA), and Southern California Contractors Association (SCCA),

First published in 1967, the "Greenbook" promotes uniformity, and eliminate conflicts and confusion, among the plans and specifications used by local public agencies. Use of the "Greenbook" lowers construction costs by encouraging participation in competitive bidding by more private contractors.. -- from publisher's web site.

Since 1967, eleven editions of the popular Greenbook have been used as the official specification, bidding and contract document for many cities, counties and public agencies throughout the West. New federal regulations mandate that all public construction use metric documentation. This complete reference, which meets this new requirement, provides uniform standards of quality and sound construction practice easily understood and used by engineers, public works officials, and contractors across the U.S. Includes hundreds of charts and tables.
