With 17.3 million viewers, the season five premiere of AMC 's The Walking Dead was the highest-rated show in cable television ...

Psychology of Fear: The Science Behind Horror Entertainment

Psychology is a science because it takes the scientific approach to understanding human behavior. Pseudoscience refers to beliefs and activities that are claimed to be scientific but lack one or more of the three features of science.

The Science of Psychology - GitHub Pages

Science assumes that there are laws of human behavior that apply to each person. Therefore science takes both a deterministic and reductionist approach. Science studies overt behavior because overt behavior is objectively observable and can be measured, allowing different psychologists to record behavior and agree on what has been observed.

Is Psychology a Science? | Simply Psychology

Scientific psychology is the total opposite of intuitive psychology. Specifically, it doesn ' t rely on beliefs or judgments to explain human behavior. Instead, it uses the scientific method and experimentation to collect objective data and interpret it. Psychological concepts are born as a result of the investigations carried out.
