This is made worse by the lack of voice for low-income urban dwellers and their lack of influence within governments and aid agencies. We are living in what is often described as the "urban century" – most of the world's economy and more than half its population are now in urban areas.

Introduction to urban poverty | International Institute ...

' Urban Poverty in the Global South: Scale and Nature moves the discussion of the multiple dimensions of poverty out of the realm of theory and academic discourse, where the bulk of the literature has been concentrated, and shows how the recognition of multiple disadvantages can reframe and energize pro-poor policies and programs. Mitlin and Satterthwaite do more than outline the general principles that should guide the next generation of policy: they offer detailed, specific insights ...

Urban Poverty in the Global South: Scale and Nature ...

The United Nations predict that by 2030, 80% of the Worlds urban population will be in the global south. This has huge implications for urban poverty. Modernisation theory argues that poverty is temporary, as when people urbanise, over time consumption would increase, so poverty would decrease.
