Written in the context of China's new intellectual property laws after WTO entry, this unique law-and-commentary guide examines the legal framework for intellectual property protection and its practical implications in the commercial world. Written for multinationals with operations in China, the book addresses the commercial realities of protecting and managing intellectual property and the practical application of Chinese intellectual property laws to business, e.g., assessing risk liabilities for all parties in the supply chain, from manufacturers to retailers, to marketing firms and importers. Among the overarching topics treated are the following: Trademarks Copyright Patents Enforcement of intellectual property rights Trade secrets Internet Technology transfer Unfair competition With key legislation, cases, and judicial interpretations and cases, China Intellectual Property Law Guide has no peers as a working reference for corporate counsel and the busy IP lawyer alike. This title forms part of the Asia Business Law Series. The Asia Business Law Series is published in cooperation with CCH Asia and provides updated and reliable practical guidelines, legislation and case law, in order to help practitioners, policy makers and scholars understand how business is conducted in the rapidly growing Asian market. This book was originally published by CCH Asia as the loose-leaf China IP Law Guide

The consumer electronics market has never been as awash with new consumer products as it has over the last couple of years. The devices that have emerged on the scene have led to major changes in the way consumers listen to music, access the Internet, communicate, watch videos, play games, take photos, operate their automobiles—even live. Digital electronics has led to these leaps in product development, enabling easier exchange of media, cheaper and more reliable products, and convenient services. This handbook is a much-needed, comprehensive engineering guide to the dynamic world of today's digital consumer electronics. It provides complete details on key enabling technologies, standards, delivery and reception systems, products, appliances and networking systems. Each chapter follows a logical progression from a general overview of each device, to market dynamics, to the core technologies and components that make up that particular product. The book thoroughly covers all of the key digital consumer product categories: digital TV, digital audio, mobile communications devices,

"The Hitchhiker's Guide to Going Wireless" quickly established itself as the essential guide to mobile technology in South Africa. Going Mobile starts where Wireless left off and shows how the vision for the future is becoming a reality today. Wireless talked about the future high-speed wireless technology called WiMax, and already WiMax services are being offered commercially. The future is rushing up on us so fast that the time for a new edition of the Hitchhiker's Guide is now. As in Wireless, we ask the critical questions: What does it all mean? Where is it all going? How do ordinary people tap into this communication revolution? Here is a guide that once again catches the wave of interest and activity, that taps into the buzz, and also sets the mobile agenda for ordinary people and businesses throughout South Africa.

The wireless Web is a reality - don't get left behind! The wireless Web is not a future dream. It is here today. Already, more than 20 million people have access the Internet through PDAs, mobile phones, pagers and other wireless devices. What will people find on the Wireless Internet? This is the question that every Webmaster and Web developer is being challenged to answer. The Webmaster's Guide to the Wireless Internet provides the Wireless Webmaster with all of the tools necessary to build the next generation Internet. Packed with the essential information they need to design, develop, and secure robust, e-commerce enabled wireless Web sites. This book is written for advanced Webmasters who are experienced with conventional Web site design and are now faced with the challenge of creating sites that fit on the display of a Web enabled phone or PDA. The rapid
